

Open letter addressed to Elon MUSK – Anchoring a global social operating system and launching a new planetary monetary system in Torreblanca Castellón, Spain and in NGOMPEM, Cameroon

By Paul Elvere DELSART aka Henry HARPER

Elon,

I am writing to you from a point you know well, even if you have never named it as such: the point where vision surpasses tools.

You build rockets with SpaceX, you connect the planet with Starlink, you reinvent energy with Tesla, and you redefine information flows with X. You have built the infrastructures of the future. The container is there.

But you know it: these are only tools.

What is still missing is not technological power. It is **the civilizational software capable of organizing humanity within these structures.**

1 - This is precisely where I come in.

For years, I have theorized what I call **the EL4DEV program**. Not a utopia, but **a social operating system designed to make societies stable, resilient, and evolving** in a world subjected to growing ecological, political, and economic crises.

Our alliance, Elon, is not an option. **It is mathematical.**

You bring the container. **I bring the content.** And sooner or later, **this equation will have to balance.**

I am not trying to convince you. I am simply anticipating the moment when **you will arrive at the same conclusion as I have.**

Because that moment is approaching.

In a world fragmented by conflicts and climate disruptions, you are facing a limit that engineering alone cannot overcome: **human instability.** You can send humans to Mars, **but with what model of society?** You can connect the planet, **but with what governance?**

You will need a **social operating system. EL4DEV is that answer.**

It **proposes an architecture capable of stabilizing territories, creating zones of resilience, and organizing autonomous societies over the long term.** A third path, independent of geopolitical blocs, **based on territorial development and social engineering.**

2 - Neutrality through innovation

If global chaos were to weaken your “Master Plans,” you would naturally look for those who have already **thought about civilizational resilience.** And you would realize that I am not proposing an idea. **I am building an infrastructure.**

I do not ask for permission. **I act.**

In Torreblanca, Castellón, a small coastal municipality in the Valencian Community, Spain, I propose **a radical alternative to the local PAI golf project of Doña Blanca.** Where some see a classic tourist

complex, I see a pilot tourist and educational city. An experimental center: **LE PAPILLON SOURCE**. I invite you to **buy these shares**, not to build a banal golf project with housing and shops, but **to create the operational center of a new ethical global economy**.

3 - At the outset, two narrative-cities and two living prototypes – City of Torreblanca Castellón and City of Ngompem

Not far from there, still in Torreblanca, but within and around **the Prat de Cabanes-Torreblanca Natural Park**, I anchor a **multifunctional agroforestry ecosystem** labeled **LE PAPILLON SOURCE Inner Europe** and **LE PAPILLON SOURCE Mediterranea**. It is from this protected wetland on the Spanish Mediterranean coast that vast **Bioclimatic Corridors** will emerge, **designed to reconnect European biodiversity** (from South to North and from West to East). **These will be the continent's new green arteries**.

This is not a project. **It is a starting point**.

At the same time, in the village of **NGOMPEM, in southwestern Cameroon, in Central Africa**, I have already **secured more than 100 hectares, mainly equatorial forest**. There, a second base will emerge on 40 hectares (multiple owners), partly cleared (with some forest areas): an experimental equatorial tourist and educational complex labeled **LE PAPILLON SOURCE Inner Africa**, capable of demonstrating **the universality of the model**.

It is from this rich territory, in the Congo Basin forest, that **Bioclimatic Corridors will emerge to reconnect African biodiversity** (from North to South and from West to East). These will be the **continent's new green arteries**.

Later, the green arteries of Europe and Africa will connect via Spain and Morocco. Additionally, through Greece and Egypt, they will connect to Asia's green arteries by replicating the process from other countries such as Cambodia, Russia, India, the United Arab Emirates, Lebanon, Iran, China, Japan, etc. The greatest challenge will be connecting Asia's green arteries with those of the Americas via Russia and Alaska, with anchor points in El Salvador, Brazil, Venezuela, Canada, the United States, Argentina, etc. It will also involve connecting Asia's arteries to those of Oceania with anchor points in Australia and Indonesia.

4 - Therefore, two continents (Europe and Africa), two countries, two anchor points to initiate a terraformation process

A single logic: what I call the **Green Empire of the East and the West** or the **EL4DEV Confederation**. The manifestation of a **new just, decentralized, and self-regulated global society after collapse**. And at the heart of this system, a **financial innovation** you will immediately understand: the **GREEN COIN EL4DEV**.

It is a non-speculative digital currency, an asset backed by the living world.

Each unit is guaranteed by tangible resources: agricultural lands labeled **LE PAPILLON SOURCE** located worldwide, **highly enriched in biodiversity**, capable of strong carbon sequestration, and **real agricultural production**. **This is a direct response to the monetary instability you already observe**. 1 m² of **LE PAPILLON SOURCE** agricultural land equals 1 **GREEN COIN EL4DEV**.

5 - An economy anchored in physical reality, not financial fiction

You have always despised systems without real foundations. **Here, value is measurable, verifiable and alive.**

What I am building today corresponds exactly to what you are seeking elsewhere: **autonomous, resilient zones capable of surviving systemic crises.**

What you imagine for Mars, **I make possible on Earth.**

And immediately. Timing is not a coincidence.

In 2026, as you accelerate in AI, mass production, and Martian launch windows, the world is becoming more unstable than ever. Supply chains are faltering. Geopolitical tensions are intensifying.

In this context, **resilient agricultural lands and autonomous infrastructures are no longer side projects. They are strategic life insurance.**

What I am offering you is not an investment. **It is an anchor point. A playground where technology and society can finally converge.**

A space where your innovations can take shape within a stable, sustainable and replicable structure.

In Torreblanca, you would not be buying a golf course. **You would be taking control of the first operational node of a new global economy.**

Perhaps your silence today is not a refusal. Perhaps it is simply a phase of observation. A silent due diligence.

You may be waiting for the context to make this alliance obvious. Inevitable. Necessary in everyone's eyes. I understand that. **That is why I continue moving forward as if this alliance were already sealed in the future. Because at my scale, it is.**

When you are ready, you will not find an idea to explore. **You will find an infrastructure already in place.**

You will understand that I was neither early nor late. I was simply on time. **And you will join me in Torreblanca Castellón, Spain. Then we will go together to Ngompem, Cameroon.**

Paul Elvere DELSART aka Henry HARPER

Performative science fiction author, Civilizational architect, Political advisor, Territorial developer, Eco-entrepreneur, Specialist in society gamification and Hybrid movement leader

From Torreblanca, province of Castellón, Valencian Community, Spain
In parallel with Ngompem, Sanaga-Maritime Department, Cameroon
