

Open letter to Elon Musk – The networked City-State and LE PAPILLON SOURCE, a new civilizational model to be experimented in Torreblanca, Castellón, Spain and in Ngompem, Cameroon – Transformation of the Doña Blanca Golf PAI project in Torreblanca

Elon,

I am writing to you as a social engineer, eco-entrepreneur, and founder of the **international EL4DEV program**, with a deep conviction: **humanity stands on the threshold of a major civilizational shift**. What I am proposing to you is not just a project. It is a **living prototype of a new model of civilization**.

A - A new civilizational model: the networked city-state

Through the EL4DEV program, I am developing a **vision based on the emergence of autonomous city-states, interconnected at local, national, and planetary scales**.

These entities do not replace nation-states; they complement and **surpass them in agility, collective intelligence and capacity for innovation**.

The small municipality of **Torreblanca, Castellón, in Spain**, is today the **starting point of this experiment**.

My ambition is clear: **to transform this territory into an autonomous city-state, an international hub of social innovation, and a prototype of the ideal 21st-century city**.

B - A distributed architecture of engineering and governance

At the core of this system lies a distributed architecture, made possible by a **multifunctional information technology called BIG SMART DATA EL4DEV** (conceptualized, with technical specifications developed, but with the technological infrastructure yet to be built).

Each citizen becomes an active contributor to the development of their territory.

Each piece of data becomes a decision-making lever.

Each interaction feeds an evolving system of collective intelligence.

We are no longer speaking of top-down governance, but of augmented participatory governance, where the population co-constructs territorial dynamics in real time.

This is an advanced form of cybernetics applied to society.

C - LE PAPILLON SOURCE: a disruptive eco-landscape infrastructure

The **international LE PAPILLON SOURCE project** is the physical foundation of this transformation.

It consists of a network of interconnected ecological, educational, agricultural, and touristic infrastructures, including:

- **Vegetal Calderas**, true vertical climate generators and reservoirs of biodiversity
- **Self-sufficient agro-climatic complexes** (productive eco-landscape systems)
- **Touristic spaces for research, education, and experimentation** (alternative experimental and educational theme parks)

These infrastructures **transform territories into productive, resilient, and deeply inspiring ecosystems.**

D - Bioclimatic Corridors at territorial and continental scale

Through the **interconnection of numerous Vegetal Calderas** (linking existing natural areas and also positioned along railway lines), I envision the **creation of true Bioclimatic Corridors.**

These corridors form living networks capable of:

- Regulating local and regional microclimates
- Supporting water cycles and atmospheric humidity generation
- Restoring ecological continuity and biodiversity
- Actively combating desertification
- Producing plant-based food
- Generating energy through a mix (solar, wind, piezoelectricity, ferroelectricity, bioelectricity)
- Attracting wildlife at scale

Ultimately, these corridors will **form transcontinental ecological frameworks, progressively transforming landscapes into interconnected living systems.**

This is no longer about simply developing land, but about **reconfiguring the climatic and ecological functioning of entire regions.**

E - The GREEN COIN EL4DEV: a currency backed by life

To support this transformation, I have designed an **unprecedented monetary instrument: the GREEN COIN EL4DEV.**

It is an ethical, ecological, and non-speculative digital currency.

Its defining principle is fundamental: **1 GREEN COIN = 1 m² of agricultural land enriched in biodiversity and labeled LE PAPILLON SOURCE.**

This **post-monetary-collapse currency:**

- Reconnects economic value with real ecological value
- Encourages soil and ecosystem regeneration

- Enables full traceability of environmental impact
- Operates within a logic of stability rather than speculation

We no longer measure wealth through financial accumulation, but through the capacity to regenerate life.

F - Transformation of the Doña Blanca Golf PAI in Torreblanca, Castellón, Spain: a strategic pilot site

Are you interested in Spain? Within this dynamic, **I propose a concrete and immediate action:**

The transformation of the Doña Blanca Golf PAI project in Torreblanca, within the Valencian Community, into an experimental LE PAPILLON SOURCE site.

This site, initially designed under a conventional development model, can become:

- The first operational prototype of an EL4DEV city-state
- A full-scale laboratory for ecological and societal engineering
- An international demonstrator of Bioclimatic Corridors
- A showcase of the GREEN COIN EL4DEV applied to a real territory

This symbolic and operational shift would mark a **decisive break from outdated development models.**

G - An ecological, touristic, and human hub

Torreblanca, Castellón will become a **major ecological hub**, but also a **new kind of tourism hub**:

- Environmental tourism
- Scientific tourism
- Educational tourism
- Entrepreneurial tourism
- Wellness tourism
- Utopian-inspired tourism
- Cultural and fiction-based tourism

Each visitor becomes a learner.

Each experience becomes a transformation.

H - A technological hub integrating your solutions

Your vision, Elon, can naturally find its place within this project.

The technologies you are developing (clean energy, storage, mobility, beneficial and carefully controlled artificial intelligence) can integrate seamlessly into the LE PAPILLON SOURCE ecosystem.

Imagine:

- Autonomous energy infrastructures inspired by Tesla
- Sustainable mobility systems
- Smart resource management networks
- Human-machine interfaces serving participatory governance integrated into my BIG SMART DATA EL4DEV system

Torreblanca could become your European and Mediterranean base to experiment with systems at real scale, in service of people.

I - Torreblanca, the narrative city: the power of storytelling

I do not only design infrastructures.

I design narratives.

LE PAPILLON SOURCE is a narrative city, a fiction-reality universe where imagination becomes a driving force for engaging younger generations (Gen Z and Alpha) and for social transformation.

Through storytelling, I activate awareness, mobilize talent, and **trigger large-scale co-creation dynamics.**

The world does not change through technology alone.

It changes through the stories that inspire action.

J - A global connection: from Torreblanca in Spain to Ngompem in Cameroon

This project is not isolated.

It is designed to connect with other experimental territories around the world, notably Ngompem in Cameroon, my birthplace and childhood home. **In Ngompem, I have secured more than 100 hectares of land, most of which consists of equatorial forest that will, of course, be preserved.**

Together, you, me, and all those who wish to take part in this planetary initiative, we will create a network of interconnected living laboratories, capable of sharing data, innovations, and human dynamics.

K - Toward Mars: terrestrial prototypes in Torreblanca and Ngompem

Finally, Elon, I propose a perspective that resonates with your vision.

Torreblanca and Ngompem can become organizational prototypes for future human colonies on Mars.

Before colonizing another planet, we must learn to **build autonomous, resilient, cooperative, and evolving societies here on Earth.**

LE PAPILLON SOURCE is precisely that: **a full-scale simulation of the civilization of the future.**

L - A concise invitation

I am not simply asking you to support a project.

I am inviting you to co-build a new civilizational paradigm.

Torreblanca in Spain (as well as Ngompem in Cameroon) can become:

- An autonomous city-state
- A global hub of societal innovation
- A laboratory for future governance
- An advanced base for human exploration

And perhaps, the first wingbeat of a butterfly capable of transforming the world.

I invite you to reply to me on X and to step into this vision.

Paul Elvere DELSART alias Henry HARPER

Performative science fiction author, civilizational architect, political advisor, territorial developer, eco-entrepreneur, specialist in the gamification of society, and hybrid movement leader

From Torreblanca, province of Castellón, Valencian Community, Spain
In parallel from Ngompem, Sanaga Maritime Department, Cameroon

EL4DEV - The Age of Collaboration

The Grand White Paper of the **Think and Do Tank LE PAPILLON SOURCE EL4DEV**, a new **Intellectual Start-up** and **Social Innovation Lab** with **international action** and **concrete action plans**.

A 117-page book, 100% **FREE** to view and/or download online (no forms, no email request).

A Mechanism of National Cohesion for a Profound Transformation of Individuals, Communes/Municipalities, and Nations.

Fundamental Principles of a Concrete Solution to Societal Challenges.

"Welcome to a fascinating journey through the revolutionary initiatives of the Think and Do Tank LE PAPILLON SOURCE EL4DEV. This book, a compilation of information sheets, aims to be an instructive and indispensable guide for anyone wishing to understand and participate in the profound transformation of our world. Through social and environmental innovation, we invite you to discover how we can, together, reshape our societies for a better future."
